POWER EUROPEAN DOORS

INTERIOR DOORS

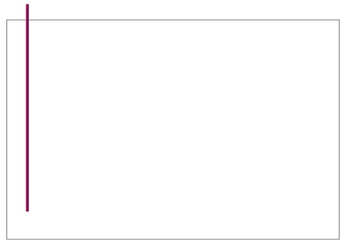

EDITION 2024/2025

TYPES OF COATING

PLATINIUM

Platinium: A foil with a polypropylene finish. Resistant to stains, scratches, and abrasion. Easy to clean, flexible. Exceptional print quality: a unique combination of embossing and printing, replicating the natural wood structure.

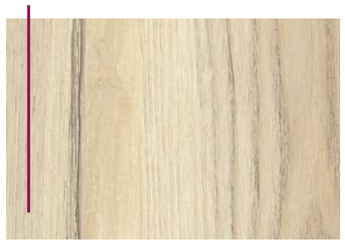

white matt

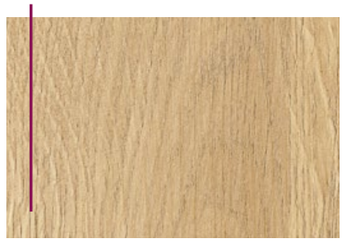

bianco

grau – similar to NCS: S2000-N••

DOOR LEAF

MAGNETIC

FULL

A new version of non-rebated doors. By using an innovative opening and closing system, we obtained a minimalistic and modern door design, without a traditional lock and handle.The door leaf is fitted with a magnetic stainless steel block, while the door frame is fitted with a magnetic stainless steel block, while the door frame is fitted with a system of strong magnets. The magnetic force causes the door to close silently and perfectly. For full door closing (locking), an option for an additional charge, small lock for bathroom or lock with cylinder lock should be used. Door leaf reinforced with solid board.

SINGLE WALL-MOUNTED SYSTEM

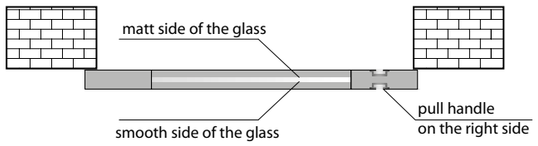

This solution enables easy and quick installation of the guide rail and the door leaf without interfering with the existing walls.
The door leaf slides along the wall on the rail installed above the door opening or fitted to the lintel.
The system set includes: aluminium rail with the length of 200 cm (SN 200/100 kg), sliding carriages, installation components and masking strip. A single wall-mounted sliding system can be made with a masking strip with the length of 150 cm.
Sliding system (aluminium rail + masking strip, length 200 or 150 cm, for "100" door leaves, the system with the length of 220 cm is recommended) | FF | 3D | CPL | PP

Door leaf:
- Sliding door leaf in the non-rebated form.
- PVC door pull handle mounted in a colour close to the door leaf decor.

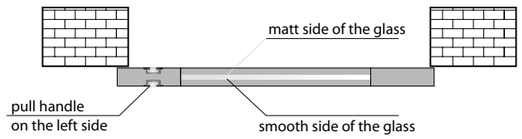

Available options at an extra charge:
- Adjustable frame "tunnel" price for standard adjustable frame and V-Retto standard, pp. 188, 190–191.
- Fender beam: | FF | 3D | CPL | PP
- Round steel pull handle
- Oval steel pull handle*
- Hook lock
- Finger pull (when ordering a hook lock, the finger pull is included in the price)
- Door closer

Varnished non-rebated door leaves are made with edge in non-soft technology (there may be a slight colour difference).
Non-rebated sliding doors are not available with ventilation undercut. Ventilation sleeves are available.

NON-REBATED LEFT DOOR LEAF (SLIDING TO THE LEFT)

NON-REBATED RIGHT LEAF (SLIDING TO THE RIGHT)

Round steel pull handle
colours: silver, black

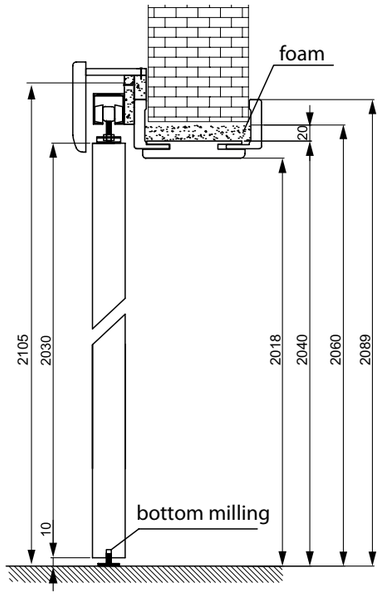

Oval steel pull handle
colours: silver, black

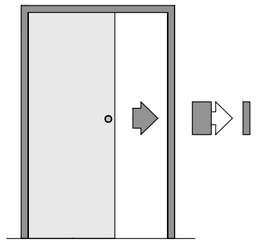

*a hook lock cannot be ordered with an oval holder

finger pull
colours: silver, black

WITH CASING – TUNNEL

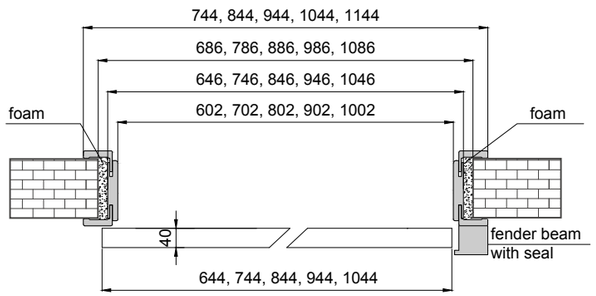

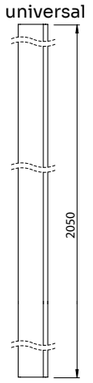

DOOR CLOSER – slows down the movement of the door leaf in the final phase of closing, while sliding it gently towards the door frame. It increases the safety of use of the door and prevents the door leaf from hitting the beam.

For interior door leaves, except for glass door leaves.

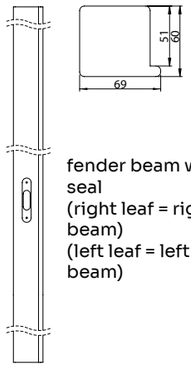

FENDER BEAM

universal

directional version (with hook lock plate)

fender beam with seal
(right leaf = right beam)
(left leaf = left beam)

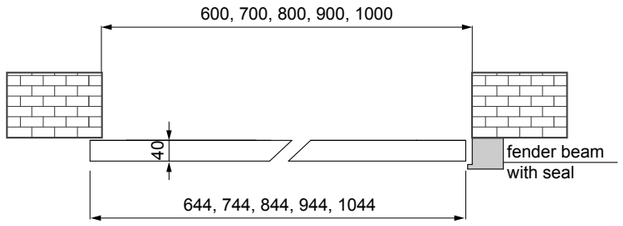

Hook lock + escutcheon
key/bathroom lock
colours: silver, black

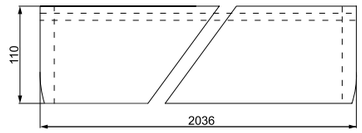

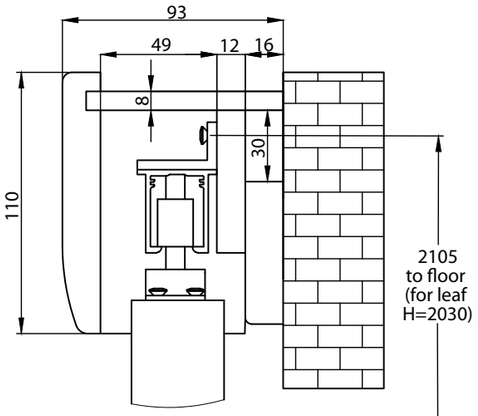

PRESENTED DECOR: PALERMO WALNUT. ETNA 10.

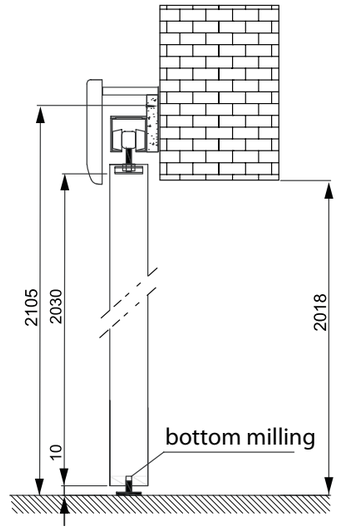

WITHOUT CASING

FRAME DOOR LEAVES	Model prices according to the catalog offer + surcharge, p. 14–99
PANEL DOOR LEAVES, GLAZED	Model prices according to the catalog offer + surcharge, p. 108–109, 118-119, 126-133
VARNISHED DOOR LEAVES FULL PLAIN, GLAZED	Model prices according to the catalog offer + surcharge, p. 136-139

DOUBLE WALL-MOUNTED SYSTEM

This solution enables easy and quick installation of the guide rail and the door leaf without interfering with the existing walls.
The door leaf slides along the wall on the rail installed above the door opening or fitted to the lintel.
The system set includes: aluminium rail 2x200 cm length (SN 200/100 kg), sliding carriages, installation components and two-element masking strip.
It is possibile to make a double wall-mounted sliding system with aluminium rail of length 2x150 cm.

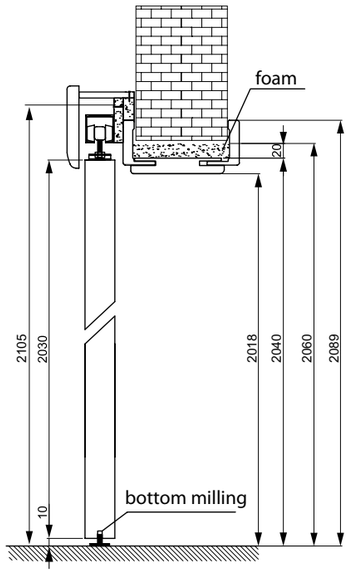

Double sliding system (2x aluminum rail + two-elements masking strip)

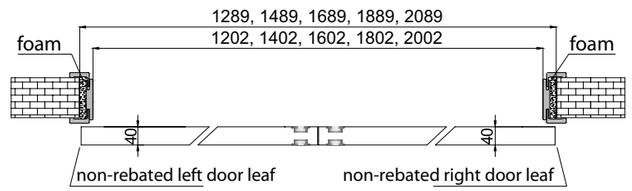

FF | 3D | CPL | PP

Door leaf:
- Sliding door leaf in the non-rebated form.
- PVC door pull handle mounted in a color close to the door leaf decor.

Available options at an extra charge:
- Adjustable frame "tunnel"
- Round steel pull handle
- Oval steel pull handle*
- Hook lock
- Finger pull (when ordering a hook lock, the finger pull is included in the price)
- Door closer for each door leaf
- Synchonization to double system

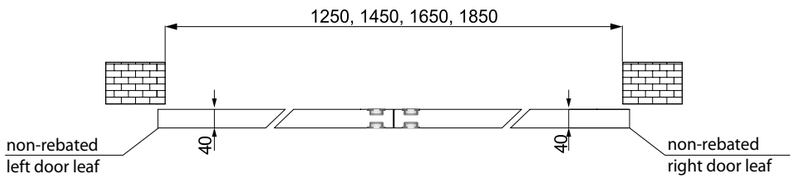

WITH CASING – TUNNEL

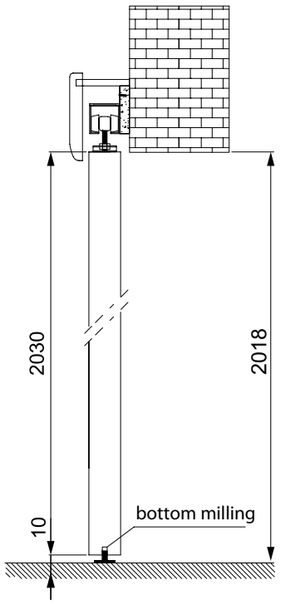

No possibility of connecting synchronizer and door closers.
Varnished, non-rebated door leaves are made with a non-soft edge technology (slight colour differences may occur).
Non-rebated doors are not available with ventilation undercut. Ventilation sleeves available.
Models: Tango – the glass application on the left door leaf is not a mirror image of the right door leaf.
When ordering a hook lock for double sliding doors, a steel pull handle for the second door leaf and a strike plate must also be ordered.

WITHOUT CASING

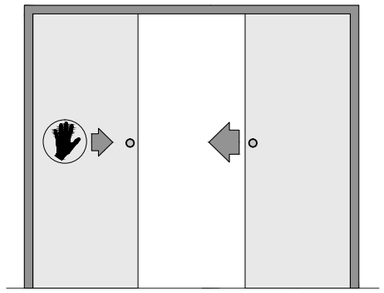

*a hook lock cannot be ordered with an oval holder

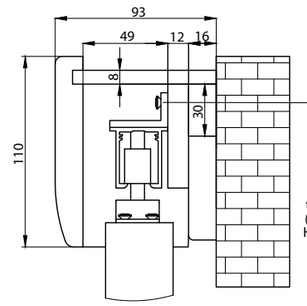

PRESENTED DECOR: BLACK MATT. PIANO 10.

SYNCHONIZATION TO DOUBLE SYSTEM

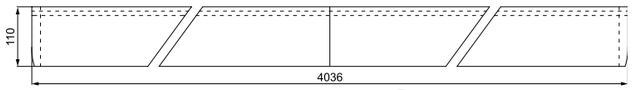

It synchronises the movement of door leaves in the double system: moving one of the door leaves of the system causes a symmetrical movement of the other door leaf.

For interior doors, excluding glass doors.

MASKING STRIP

Round steel pull handle
colours: silver, black

Oval steel pull handle

SYSTEM
LOFT GLASS

LOFT PURE GLASS - a system that combines high level of aesthetics and functionality, designed for internal sliding glass doors.
The use of the Loft Pure Glass system will not only optically enlarge the space, but also emphasise the unique, modern and elegant character of the interior, full of sunlight and space.

Advantages of the system:
- enables using glass panes in various finishes, which allows emphasising the individual character of the room, discreet separation, or integration with the overall interior design.
- the system provides additional light to the space, while optically enlarging it
- the colour of the hardware follows the latest trends in interior design
- the use of the Loft Pure Glass system adds lightness, elegance and modern look and feel to the interior

HOLDER

holder

LOFT TRANSPARENT WHITE
LOFT TRANSPARENT GRAPHITE

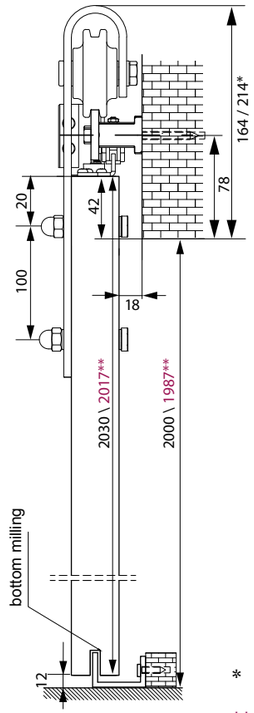

SYSTEM
LOFT LINE

The loft line collection includes systems inspired by loft-vintage aesthetics.
The exposed mechanics components of the system in dark varnish coating colour adds a unique industrial character to the interior.
The system is not applicable to Vento and Mono door leaves.
A tunnel cannot be installed.

Advantages of the system:
- Quiet and smooth movement thanks to bearing rollers
- Easy installation, enables setting the door in any position
- The varnish coating covering the guide rail and all components of the system is highly resistant to mechanical damage and also prevents dust accumulation.

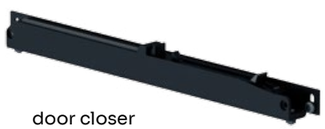

Sliding system **LOFT LINE**
Sliding system **LOFT LINE XL**

DECORATIVE LAMELLAS

Lamellas – a decorative component designed for both wall and ceiling decoration.
A lamella consists of two components:
– mounting strip, mounted directly on the wall or ceiling using the assembly adhesive or screws
– "U"-profile covered with decorative foil, installed on the mounting strip.
The lamella is made of MDF board and covered with foil:
FF, 3D, CPL, PP

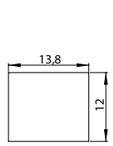

Lamellas packaged in sets of 4 pieces.
Length 2800 mm.
Package weight: 14 kg.
The lamellas are only sold in a set

Due to the non-standard dimensions of the packaging (length over 2800 mm), additional transport costs must be added in some cases:
– weight up to 30 kg (1-2 sets)
– weight up to 500 kg

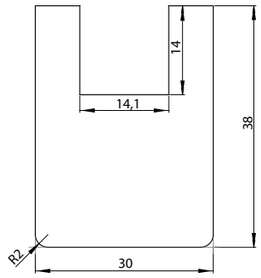

For any additional transport costs, please ask at the point of sale.

Unedged lamellas – to be cut by oneself.

REBATED DOOR LEAF

NON-REBATED DOOR LEAF

REVERSE DOOR LEAF

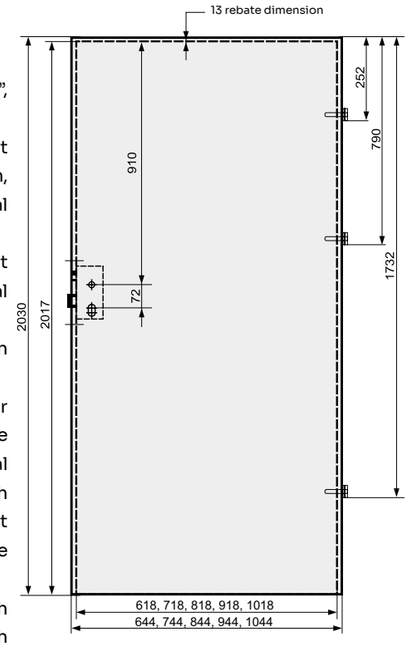

OPENING DIRECTION OF REVERSE DOOR LEAVES – P. 110

REBATED SINGLE DOOR LEAVES

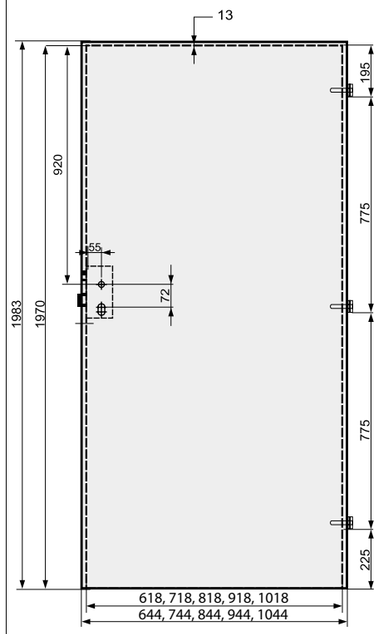

Voster door leaves are compatible with all door frames in accordance with Polish building norm.

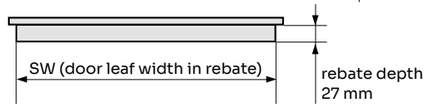

- Standard door leaf width: “60”, “70”, “80”, “90”.
- “100” width – frame door leaves (not applicable to Kubus, Lupus, Mediolan, Evi, Piano, Tago, Fado), additional charge.
- “100” width – panel door leaf (not applicable to Perla model), additional charge.
- The lock features the single key turn option.
- Since the decorative foil covering our products represents the grain of the wood, which does not have identical grains and colours on the entire length and width, the decorative foil does not have identical colours and grains in the longitudinal and transverse direction.
- Plain door leaves (honeycomb) width 100 and door leaves reinforced with solid board width 60-100 are equipped with three hinges.

NORM PL

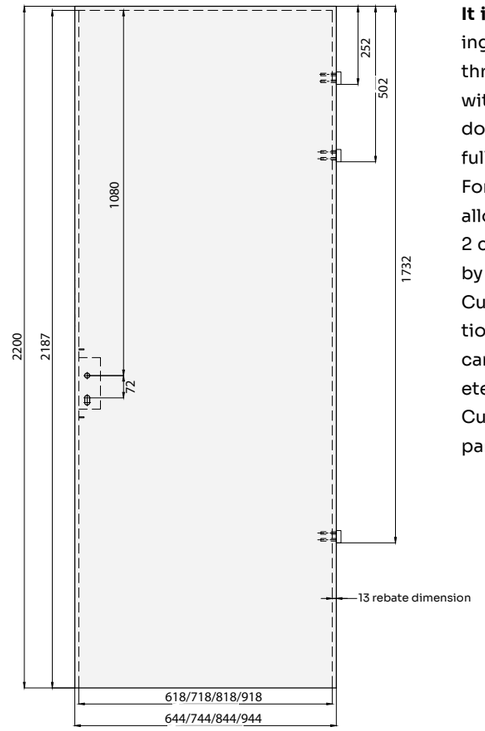

NORM CZ

REBATED SINGLE DOOR LEAVES H220

It is not allowed to cut door leaves: sliding, double, folding, with an automatic threshold, glass door models, or those with glass inserts within the cutting area, door leaves with lamellas, intarsia, and full-height pull handles.

For framed door leaves, the Polish norm allows cutting by up to 4 cm (Loft model 2 cm), and the Czech norm allows cutting by up to 3 cm.

Cutting the door leaf to the above-mentioned heights does not result in a significant loss of the structural strength parameters.

Cutting of panel door leaves with a full panel filling is allowed up to 4 cm.

GLAZING*

Thickness 4 mm.
Tempered glass.
Smooth on both sides.

TRANSPARENT GRAPHITE GLASS

Thickness 4 mm.
Tempered glass with a white application, which is applied to the opening side of the leaf.
